

FOR IMMEDIATE RELEASE

**OPTIMALTEST'S GLOBAL TEST OPERATIONS SOFTWARE
WINS 2009 'BEST IN TEST' AWARD**

*Company is two-time 'Best in Test' winner for its semiconductor test optimization
and management solutions*

Nes Ziona, Israel, April 2, 2009 – OptimalTest's Global Test Operations solution has been voted a 2009 winner in the annual Best in Test competition held by *Test & Measurement World*, a prominent industry publication, to "honor important and innovative new products and services in the electronics test and measurement industry." OptimalTest, a leader in providing enterprise-wide software solutions for test operations management to the semiconductor industry, also won the highly valued Best in Test award in 2007 for its Test Management Solutions software.

OptimalTest's Global Test Operations solution was named a finalist by *Test & Measurement World* editors in the category, "EDA/DFx/Test data-analysis Software." Voting for Best in Test nominees was opened to the industry in December, and winners were announced by Test & Measurement World on April 1 in its monthly publication and at an awards dinner held during the IPC APEX Expo, March 31 – April 2, 2009, in Las Vegas.

OptimalTest's Global Test Operations solution is targeted to fabless organizations and IDMs with distributed and out-sourced test operations. Its capabilities permit the creation of global integrated test operations. It is the industry's first comprehensive turnkey solution providing a single integrated view of global test operations and processes, vertically within an organization or globally dispersed across multi-enterprises, in real time, "near time", or offline, driven by the needs of the business model.

OptimalTest enhanced recent technological advances – such as a centralized database with rapid data retrieval and IT backbone technology – and built on previous adaptive test approaches by introducing patented Advanced Adaptive Test methodologies to catapult global test operations optimization and management into a new, world-class category of performance.

Dan Glotter, co-founder and CEO of OptimalTest, says, “We thank the industry for acknowledging the singular contribution of our Global Test Operations to advancing the state-of-the-art in test optimization and management. On behalf of all our employees, we greatly appreciate this honor.”

About OptimalTest

Established in 2005, OptimalTest provides comprehensive test management software solutions incorporating advanced adaptive test techniques. The company’s suite of software is unique for its breadth, incremental modularity, seamless connectivity and real-time capabilities. Its solutions allow adaptation and enhancement of test processes and operations through continuous automated learning, advanced adaptive test techniques, and expertly culled data that is decision-ready. The results are significant improvements in yield, test time reduction, reliability and quality as well as reduced cost of test. OptimalTest has growing worldwide operations in Asia-Pacific, Europe and the United States. For more information, go to www.optimaltest.com.
