

18 March 2008

For Immediate Release

**KENNETH LEVY, INTERNATIONAL SEMICONDUCTOR INDUSTRY VISIONARY, JOINS
OPTIMALTEST AS CHAIRMAN OF THE BOARD**

Haim Shani, CEO of NICE, is also joining the OptimalTest Board of Directors

Tel Aviv, Israel, March 18, 2008 – OptimalTest, the leader in providing innovative and integrated enterprise-wide test management solutions, announced that semiconductor industry visionary and leader Kenneth Levy and NICE Systems (NASDAQ: NICE) CEO Haim Shani have joined the company's Board of Directors. The addition of these two new board members will aid OptimalTest in penetrating new markets and securing strategic partnerships.

Kenneth Levy, who has been involved with the semiconductor industry for more than 35 years, is the founder, retired CEO and Chairman and currently Chairman Emeritus of KLA-Tencor Corporation, the world's leading supplier of process control and yield management solutions for the semiconductor and related microelectronics industries, with an annual turnover of more than \$2 billion. Levy has been active as a Board Member of a number of technology companies. He presently serves on the Board of Extreme Networks, and previously served on the Boards of Juniper Networks, Ultratech Stepper, PowerDsine and Saifun Semiconductors. He is considered a leader and visionary in the international semiconductor industry. In recognition of his many contributions to the industry, Levy has received numerous awards, including the "SEMMY Life Time Achievement Award," and the Semiconductor Equipment and Materials Institute Award. He also has been inducted into Silicon Valley's "Hall of Fame," has received the Harvard Business School Association "Silicon Valley Entrepreneur of the Year" and was elected as a member of the National Academy of Engineering "for the development and commercialization of automated inspection systems for the semiconductor industry."

"I am very pleased to join the OptimalTest Board as Chairman," said Kenneth Levy. "The company is led by a high quality, experienced management team and has a superior product concept which addresses a major problem in semiconductor testing. I look forward to sharing my 40 years of business experience with OT's management, and helping them in their goal of building a very successful Israeli hi-tech company."

Haim Shani, the CEO of NICE, is also joining the board of OptimalTest. NICE is a leading global provider of Insight from Interactions advanced solutions and value-added services, powered by advanced analytics of unstructured multimedia content - from telephony, web, radio and video communications – to drive performance. Shani will aid OptimalTest in their development of a long-term business infrastructure while enabling the company to benefit from his extensive management experience launching Israeli companies in international markets.

Shani has served as the CEO of NICE since 2001, and before that, held a series of senior management positions at Applied Materials where he led the company's Process Diagnostic and Control (PDC) business group. Prior to joining Applied Materials, Shani held various management positions at Orbotech Ltd., including Corporate Vice President of Marketing and Business Development and President of Orbotech's subsidiaries in Asia Pacific and Europe. Prior to joining Orbotech, Shani held various management positions at Scitex Corporation and IBM.

"I am pleased to join the OptimalTest board," said Haim Shani. "I look forward to sharing my many years of experience in building Global Israeli high-tech companies with the talented OT management team. Their vision of revolutionizing the (testing process) of the Semiconductor Industry is exciting, and a clear demonstration of the innovation one can find in this country."

OptimalTest CEO Dan Glotter noted that the addition of Kenneth Levy and Haim Shani to the OptimalTest Board of Directors is a vote of confidence which serves to validate the company's products, management and employees. "There is no doubt that the addition of such visionary industry leaders to the board of directors will enable OptimalTest to maintain its leadership position in the advanced test management solutions market for the semiconductor industry," said Glotter.

About OptimalTest

Established in 2005, OptimalTest provides integrated, comprehensive, universal automated test management software solutions for the entire test process for semiconductors. OptimalTest is committed to helping test and semiconductor professionals master test management through its solutions software so they can achieve unprecedented ROI on their technology assets and lower test cost of ownership. A privately held company, OptimalTest's founders are a seasoned management team with experience at the world's best-known semiconductor and computer companies. OptimalTest is a growing global company and has world-wide operations in Asia-Pacific, Europe and the United States. Optimal Test has secured \$28 million in funding from prominent venture capital firms Evergreen Venture Partners, Pitango Venture Capital and Carmel Ventures and has signed contracts worth millions of dollars with the leading Semiconductor manufacturer.
